Dear Veterinary Immunologist,

On behalf of the IVIS 2025 Organising Committee, it is our privilege to invite you to the 14th International Veterinary Immunology Symposium (IVIS2025), hosted at the Hilton Vienna Park, Austria, from August 11-14, 2025.

This is the first time this symposium will be hosted in Vienna, providing a unique opportunity to meet colleagues from Europe and around the globe in this historic and vibrant city. Experience the rich cultural heritage, stunning architecture, and exquisite local cuisine that Vienna has to offer!

Vienna, with its blend of historic charm and modern innovation, is an ideal location to discuss the critical intersections between human societies, their domestic animals, free-living wildlife, and the environments they inhabit. In a context of global change, sustainably improved livestock systems and disease control are essential for not only the commercial livestock trade, but also for subsistence farming, food safety and security, human wellbeing, and biodiversity conservation. In this spirit, IVIS2025 will address the challenging research issues raised for veterinary science in a One World – One Health perspective.

IVIS2025 will also bring together experts to share the most exciting results and insights in the field of veterinary science and immunology, including biological mechanisms underlying host-pathogen interactions and specificities, vaccine and therapeutic strategies, innate and protective immunity, disease diagnosis and control, and reagent and methodological developments. This symposium will provide an opportunity for delegates from all involved sectors to engage and network with leaders in the field.

Our goal is to host a Symposium that is friendly, safe, welcoming, respectful, and inclusive to all attendees. We are committed to creating an environment where everyone feels valued and empowered.

On behalf of the Organising Committee, we are excited to welcome you to Vienna and a memorable symposium, both scientifically and socially!

#### Preliminary Themes:

- Innate immunity
- Immunity to infectious diseases
- Tissue-specific immunity (→ mucosal immunity)
- Adaptive immunity
- Vaccine development
- Comparative Immunology and animal models

#### Program Design:

- 36** Planned Sessions
- 24** Concurrent Sessions | **90+** Abstract Driven Oral Presentations
- 9** Plenary Sessions
- 3** Poster Sessions | **80+** Abstract Driven Poster Presentations
- 2** Social Events
- 10+** Exhibits

#### Important Dates:

Abstract Submissions Open	October 2024
Early Registration Open	October 2024
Abstract Submissions Close	March 2025
Abstract Submission Notices	April 2025
Regular Registration Open	April 2025

#### Organising Committee:

Tobias Käser (PhD), Symposium Chairperson  
Sabine Hammer (PhD), Co-Chair of the Scientific Committee  
Kerstin Mair (PhD), Co-Chair of the Scientific Committee  
Eva Watrang, Treasurer  
Sven Parsons, Committee Member
