

# Where Veterinary Immunologists Meet

IVIS2025 will bring together experts to share the most exciting results and insights in the field of veterinary science and immunology, including biological mechanisms underlying host-pathogen interactions and specificities, vaccine and therapeutic strategies, innate and protective immunity, disease diagnosis and control, and reagent and methodological developments. This symposium will provide an opportunity for all veterinary immunologists from the global community to meet, engage, and learn from one another and will provide an opportunity for delegates from all involved sectors to engage and network with leaders in the field.
